

NASA Presents Special Act Award to Ex3

November 2008

TEMPE, AZ -- Efficient Enterprise Engineering, Inc. (Ex3), an provider of environmental, health, safety, security, and productivity data management, has been awarded the NASA Safety Center Special Act Award for valued and outstanding support.

In announcing the award, NASA officials noted that Ex3 has worked diligently to assist the NASA Safety Center in enhancing NASA capabilities for the needs of the Exploration Era.

The award represents Ex3's participation with and support of the NASA Safety Center in the management of occupational health and safety data, including safety incident investigation in all NASA centers agency wide. Additionally, Ex3 provides the software system for managing space flight hardware issues reporting and resolution.

Ex3 worked with many different NASA Centers and personnel to assess changing requirements and provide the continued innovation in design and scalability critical in how data is being gathered across NASA. The data collection capabilities provided through the Ex3 system assists the agency during the challenging technical and organizational transitions supporting the era of exploration for NASA and for our country.

"This being the second time that we've earned an award from NASA adds to the validity of our products, our technology, and our company overall," said Nathan Giles, President and CEO of Ex3. "This award means that NASA continues to view the partnership with Ex3 as being very successful and productive." The NASA Safety Center, the agency's chief implementation arm for safety data collection, trending and analysis and safety knowledge management, is located in Cleveland, OH.

"Ex3 provides data collection and analysis support to the Knowledge Management Systems Office at the NASA Safety Center. Their support is important to the overall success of our project," said Suzanne Otero, NASA Project Manager.

Efficient Enterprise Engineering, Inc. (Ex3), founded in January of 1997 is an Arizona Corp. with headquarters in Tempe, AZ. Ex3 is an industry leader in the design, development, and implementation of successful web-based and enterprise-wide software systems focusing on environmental, health, safety, security and productivity data management.
